Rashad Walcott

516-765-6128 | rashad.walcott15@gmail.com | Github | LinkedIn | Medium

Full Stack Developer with expertise in JavaScript, React and Ruby on Rails. I am a Veteran with a background in telecommunications. Combined with my military experience, I bring strong skills in problem solving by using inventive ideas in the support of team collaboration and productivity.

TECHNICAL PROJECTS

Brewsters App - Github(Client) | Github (API)| Demo
Users can locate breweries in New York and save them to their profile and view more information about selected breweries
+ Connected with the Open Brewery DB API for public information on breweries
+ Implemented a React based front-end and vanilla CSS for styling
+ Built a Google Maps API to render interactive google-style map
+ Established a Ruby on Rails API backend with endpoints for users and breweries

GitJobs - Github(Client) | Github (API) | Demo
Users can locate jobs postings on Github and save them to their profile with links to apply
+ Coded a user interface with React and Sass for styling
+ Scraped Github Job API to pull and parse job postings data
+ Developed a Ruby on Rails API backend for job postings and users
+ Employed JSON Web Tokens and localStorage to store encrypted user information on client-side

Shad's Recipes - Github | Demo
User can view and post recipes, as well as like, and leave comments
+ Constructed a single page application with Vanilla Javascript
+ Utilized forms to provide input for image URL and recipe details
+ Operated Ruby on Rails controls the back-end, models and controllers of MVC
+ Designed front-end with custom CSS
